

Stroke is the third-leading cause of death in the United States and a leading cause of disability. However, research shows the public remains unaware of its warning signs and the need for immediate medical attention, even if the symptoms subside.

The Stroke Collaborative is a joint campaign of the American Academy of Neurology, the American College of Emergency Physicians and the American Heart Association/American Stroke Association to educate everyone to recognize stroke symptoms, call 9-1-1 and get to the emergency department.

About American Academy of Neurology (AAN)

The American Academy of Neurology, an association of more than 21,000 neurologists and neuroscience professionals, is dedicated to improving patient care through education and research. A neurologist is a doctor with specialized training in diagnosing, treating and managing disorders of the brain and nervous system such as Alzheimer's disease, epilepsy, multiple sclerosis, Parkinson's disease and stroke. For more information about the American Academy of Neurology, visit aan.com.

About The American College of Emergency Physicians (ACEP)

The American College of Emergency Physicians is a national medical specialty society representing emergency medicine with more than 25,000 members. ACEP is committed to advancing emergency care through continuing education, research and public education. Headquartered in Dallas, Texas, ACEP has 53 chapters representing each state, as well as Puerto Rico and the District of Columbia. A government services chapter represents emergency physicians employed by military branches and other government agencies.

About American Stroke Association (ASA)

The American Stroke Association is solely focused on reducing disability and death from stroke through research, education, fund-raising and advocacy. The American Heart Association's commitment to stroke is clear with the creation of the American Stroke Association. ASA provides a basis for strong science, credibility, public and professional recognition and the ability to leverage a strong, existing national infrastructure.
